Bracket

⚠ WARNING

1. AC100~240V Power connection.

2. Disconnect the power of the fuse or circuit breaker before installing.

Installation

Step 1   Turn power off of the breaker. If you do not know where your breaker is or how to turn off power, consult with a licensed electrician.
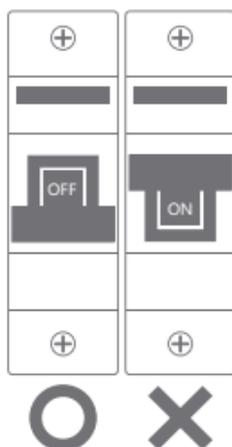

**Step 2**   Fix the bracket on the wall.
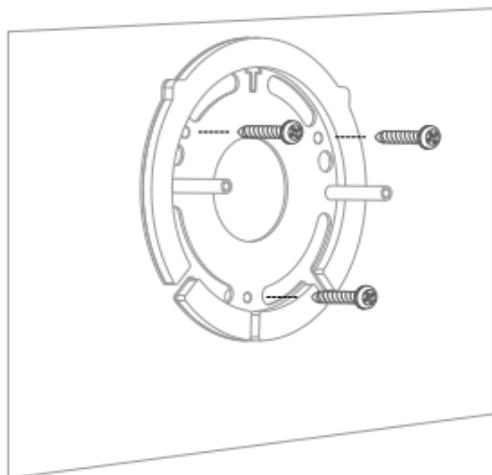

Step 3

Unscrew the nuts at both ends of the waterproof terminal and connect the corresponding live, neutral, and ground wires respectively.

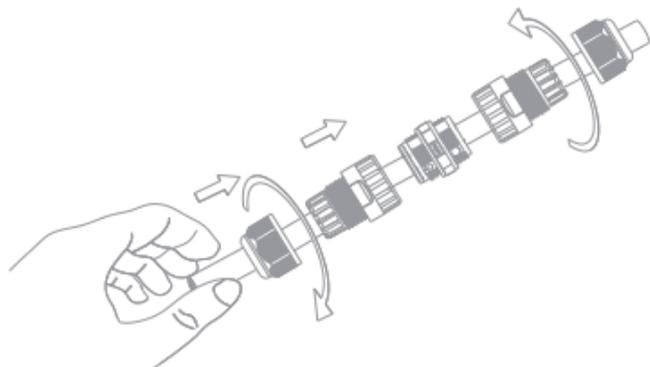

Note: Remove the outermost wrapping layer, the reserved colored power cords do not exceed 17mm, and the peeled part of each colored power cord does not exceed 5mm.

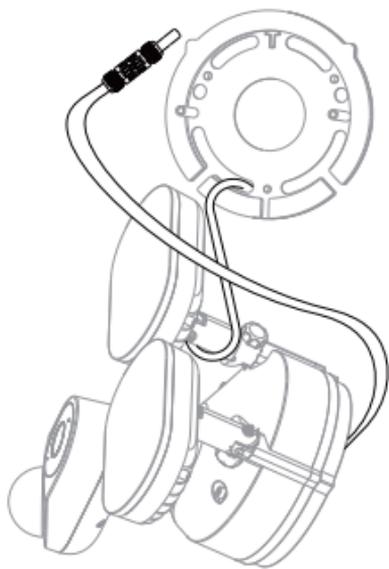

17mm

5mm

FAQ

Q: The device cannot be previewed properly?

A: Check whether the network is normal, you can place the camera close to the router, and if not, it is recommended to reset the device and add it again.

Q: Why is it still in the list of devices after reseting?

A: The reset device only resets the network configuration of the camera, but cannot change the configuration on the App, remove the camera, and must be deleted by the App.

Q: How to cut the camera network to another router?

A: First remove and reset the device on the App and then configure the device again by the App.

Q: Why doesn't the device identify the SD card?

A: It is recommended to plug in SD card after power cut. Confirm whether the SD card is normally available and the format is FAT32. And the TF card can't be identified when the internet environment is not good.

Q: Why I can't get the notifications with my cell phone App?

A: Please confirm that the App has been running on the phone, and the relevant reminder function has been opened;Message notification and authority confirmation in the mobile phone system have been opened.
